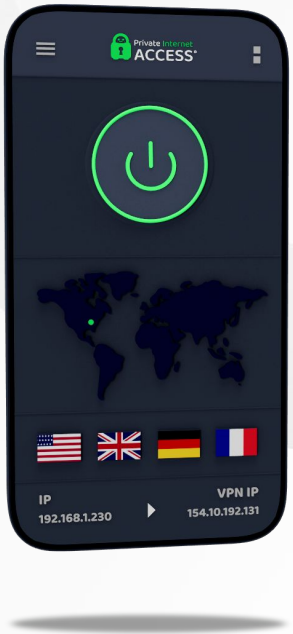
Private Internet ACCESS®

Discover Private Internet Access

The most transparent VPN on the market



Protect Your Digital Life With Private Internet Access

- 30+ million downloads
- 10+ years of VPN expertise
- 100% open-source software

Privacy Protection

We reroute your internet traffic through an encrypted tunnel, giving you a new IP address and hiding browsing data from Internet Service Providers, network administrators, and government censors.

Absolutely No Usage Logs

We never record or store any usage data, and this has been proven multiple times in court. It's one of the many reasons we're the most transparent VPN on the market.

Smooth Streaming

Our apps work with all major streaming services, so you can access more content than ever before anywhere in the world. Plus, Private Internet Access is one of the few VPNs that support P2P file sharing on all servers.

State-of-the-Art Tech

We only use the best available encryption standards (128-bit and 256-bit AES) and VPN protocols (OpenVPN and WireGuard). In addition, our entire infrastructure is top-notch, so you know you're always getting the best VPN performance.

Private Internet ACCESS®

Trustpilot Rated **Excellent** based on 8,500+ reviews

Fully Open-Source Apps

Being completely transparent is one of our guiding principles, so all Private Internet Access apps are 100% open-source. This way, you can always take a look under the hood and see how everything works.

Completely Customizable

Giving users control is essential to us, so we made Private Internet Access highly customizable. Our apps give you complete control over your connection, network, and configuration settings. Plus, split tunneling is included.

Token-Based Dedicated IPs

With Private Internet Access, you can get a unique, personal IP address without sacrificing any privacy or security. Use a dedicated IP to work remotely, see fewer CAPTCHAs, and protect your IoT devices.

Fast and Easy Setup

To start protecting your digital life, all you have to do is choose a plan, download Private Internet Access, and tap the connect button. And that's it; you're good to go!

Independently Verified No Logs Policy

We're proud to be privacy advocates – but don't just take our word for it. We invited an independent audit by Deloitte to verify that our server network and management systems are in full compliance with our No Logs Policy.

You can rest assured that our commitment to protect your privacy is absolutely bulletproof.

Private Internet ACCESS®
